**11590 and 11591. LILIU LONGIFLORUM EXIMIUM GIGANTEUM. Lily.**

Grown from S. P. I. No. 11583 in the Department greenhouse.

**11590.** Bulbs.

**11591.** Seeds.

**11592 to 11602.**

From Guadalajara, Mexico. Received thru Mr. Federico Chisolm, July 11, 1904.

Small lots of seeds of Guerrero plants, as follows:

**11592.** ENTEROLOBIUM CYCLOCARPUM.

**“Parota.”**

“One of the most admirable shade trees I have ever seen, a rapid grower, and valuable for the easily worked but durable lumber it yields, as well as for the seeds, which are largely eaten by the natives at this season and are greedily eaten by hogs. The measurements of a specimen shading the assay office at ‘La Trinidad’ were about as follows: Trunk, from ground to branches, 12 feet; diameter, 4 feet; from ground to top of tree, 59 feet; extreme spread of branches from tip to tip, measured thru trunk, 122 feet; the general outline similar to that of an umbrella. To me it seems a tree well worth introducing.” (Chisolm.)

**11593 to 11602.**

A collection of unidentified plants, mostly bulbs.

**11603 to 11623.**

From Fort Hays, Kans. Received thru Mr. J. G. Haney, superintendent of the Branch Agricultural Experiment Station, August 1, 1904.

**11603 to 11617.** TRITICUM VULGARE.

**Wheat.**
